## Empower Your Practice: Take Control with Point-of-Care Cold Compression

*Designed For: Orthopedic Practices Wanting to  
Enhance and Manage the Recovery Process In-House*

Seeking greater control over the post-operative recovery process within your practice? Managing durable medical equipment (DME) and ensuring immediate patient access to essential therapies like cold compression can be challenging.

ORS provides a proprietary point-of-care cold compression therapy program. We empower orthopedic practices to directly manage and provide this crucial recovery modality, enhancing patient care and streamlining processes right from your facility.

### Key Benefits:

- **Practice Control:** Integrate and manage cold compression therapy directly within your practice.
- **Point-of-Care Convenience:** Immediate access for patients post-procedure or at follow-up visits.
- **Proprietary Program:** A structured system designed for seamless implementation.
- **Enhanced Patient Experience:** Provide immediate, hands-on solutions for pain and swelling management.
- **Streamlined Workflow:** Simplify the process compared to external DME coordination.

**Integrate leading cold compression therapy directly into your patient care pathway.**
